

Dear users, finally RIL 3.0 is a reality and we have started the process transfer to the new platform, for this we have created this instruction that facilitate it.

It should be noted that the transfer process is limited and will end on the 15th February 2021 at 11:59 p.m. Venezuela time. From that moment on all RIL 2.1 and earlier seed servers will be disconnected.

This process must be manual due to the incompatibility between the blockchains, to Despite maintaining the same algorithm, the added value and the consensus change do not allow the transfer to be carried out automatically. Remember that you will lose all your investment if you do not make the change before the date indicated.

Instrucciones para el cambio de monedas desde RIL 2.1 a RIL 3.0

1) Make a transfer from your 2.1 wallet to the RIL wallet:

LtYfbtN27YnyUzRbv638xKUqYJnLQbVgBf

2) Once the shipment is made, you must copy and save the tx id and amount sent, to position it as indicated in step 7

3) Visit the rilcoin 3.0 repository at the following link

<https://github.com/rilcoincrypto/rilcoin-3.0/releases/tag/v3.0.0.0>

4) Download your new Wallet based on your operating system (Linux, windows)

5) Install your Wallet by following the steps indicated in the following link

<https://github.com/rilcoincrypto/rilcoin-3.0/blob/main/README.md>

Note that mining is optional, but is recommended to secure the network and somehow generate rewards

6) Generate a receiving address in your wallet

7) Send the data indicated below to the email address

email: support@rilcoin.org

You can also send the data via Telegram to @totaltrader2004

Wallet 2.1 (previous):

Transaction ID:

amount:

Date:

wallet 3.0 (actual)
